Art Unit: 3634

DETAILED ACTION

This final Office action is in response to the amendment filed April 10, 2006 by which claim 1 was amended and claims 6 and 9 were canceled.

Election/Restriction

Claims 10-32 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant's election without traverse of Group I, i.e., claims 1-9, in the reply filed on October 24, 2005 is noted.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 3 stand rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rendered indefinite by the recitations "support side edges" and "supporting a front edge" in lines 3 and 4, respectively. *In particular*, these *positive* recitations improperly seek to link positively recited structure, i.e., the supporters, to functionally recited structure, i.e., the edges of the glass. A functional recitation, such as --adapted to support--, should only be used when linking positive structure to functional structure. This rejection is also applicable to claim 3 (see lines 4 and 8).

Art Unit: 3634

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5, 7, and 8 stand rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 6,092,981 (Pfeiffer et al. '981).

Pfeiffer et al. '981 disclose a cassette (see Figures 9-11) comprising side frames (vertically extending elements in the left rear and right rear perspective in Figure 9), a rear frame (vertically extending element in the left front perspective) and a front frame (element 102 and the vertically extending element in the right front perspective) whereby each frame is cylindrical (at 62 in Figure 6) and each frame comprises a plurality of supporters (68 - see Figure 6) capable of supporting edges of a glass; the rear and front frames having a center supporter (66) disposed amid the plurality of supporters (68) whereby the center supporter (66) is longer (see Figure 6) than the rear and front supporters (68); the front frame (at 102) including an arm accommodator (hole therein) which allows a transfer device (120-130) to enter the cassette; and with respect to claims 5 and 8, the arm accommodator having a step shape (see bottom of Figure 9 which shows a notched side on the left and right sides thereof) - it is noted that the claims do not require that the step shape needs to accommodate the transfer device.

With respect to the recitation "to store an LCD glass having a plurality of edges" in lines 1-2 of claim 1, it is noted that this is a functional recitation, i.e., the claims are not positively requiring that such an LCD glass be provided (see Section 112, 2nd paragraph rejection advanced above also). *Thus*, a reference need not explicitly show use with such a glass (i.e., having a plurality of sides) in order to meet the claim language. *Rather*, a reference need only "be capable of being used" with such a glass to meet the recitation. *Accordingly*, since Figures 9-11 of Pfeiffer et al. '981 show a cassette having multiple side, i.e., the cassette is considered to be

Art Unit: 3634

rectangularly shaped, Pfeiffer et al. '981 is certainly capable of storing, holding, etc., a glass having a plurality of sides, as recited in claim 1, thereby reading on the claims.

Response to Arguments

Applicant's arguments filed April 10, 2006 have been fully considered but they are not persuasive.

With respect to applicant's argument that "Pfeiffer fails to teach or suggest an LCD glass cassette to store an LCD glass having a plurality of edges", it is noted that as advanced above, the Pfeiffer et al. '981 reference is considered to be "capable of being used" with such a glass, thereby meeting the claim language.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
